

COVID-19 FAQ

1. Are volunteer EMS personnel covered under state workers' compensation laws?

Date Added: 03/30/20

Answer: State workers compensation laws generally provide coverage for volunteer firefighters and EMS personnel for wage losses and medical benefits. If you are a volunteer and contract COVID-19 in the course of your duties and you seek evaluation and treatment for the illness and it was contracted during the course of your duties, it would generally be compensable under most state workers' compensation laws.
